Objective

Front-end developer with experience in React and using technologies such as TypeScript, Zustand, Redux, and Tailwind CSS to create modern web applications. My approach includes implementing Clean Code and ensuring quality through unit, component, and mutation testing. Experienced in environments with structured agile processes, actively participating in all Scrum rituals, code reviews, and change management (CM), with basic knowledge of back-end development in Java Spring.

Graduation

UFAPE - Universidade Federal do Agreste de Pernambuco
Computer Science
2018 - 2025

Certifications

AWS Certified Cloud Practitioner - April 2024

Experience

Nov 2023 - At the moment

Front-end Developer | Compass UOL

DevStore Project: I worked as the lead front-end developer, being solely responsible for delivering the project in its final phase. I developed and maintained scalable web applications in React, using Zustand, Redux, and React Query for state management and consuming REST APIs via Axios. My experience includes using TypeScript, Shadcn, Tailwind CSS, Styled Components, and Material UI to create optimized and accessible user interfaces. I actively contributed to quality assurance through automated testing with Vitest.

Vivo Telefônica (currently): I participated in multiple projects focused on microfrontends in the Fintech area. I applied clean code principles and used Mística for UI development. I was responsible for ensuring code robustness through a comprehensive set of tests, including unit tests with Jest, component tests with Cypress, and mutation tests with Stryker.

Nov 2023 - Mar 2024

Front-end Intern | Compass UOL

Compass UOL scholarship program focused on front-end development and cloud computing fundamentals. During the program, I deepened my knowledge of React, exploring technologies such as Redux, React Query, and other essential tools for building modern and scalable applications. The internship culminated in obtaining the AWS Cloud Practitioner certification, consolidating skills in cloud services and AWS best practices..

Sep 2023 - Sep 2024

PIBIC Researcher | CNPq

Research: PIBIC - Vulnerabilities caused by commits. Supervised by Professor Dr. Rodrigo Andrade.

Jun 2023 - Dec 2024

Introduction to Computing Teaching Assistant | UFAPE

Assisted in the Introduction to Computing course taught by Professor Dr. Ryan Ribeiro de Azevedo.

Languages

Spanish - **Beginner**

Portuguese - **Fluent**

English - **Intermediary+**

Knowledge

Methodologies: Scrum and Kanban

Databases: MySQL, Postgres, MongoDB

Front-End: React, React Native, Next.js, HTML, CSS, Material UI, Tailwind CSS, Styled Components, Javascript, Typescript

Version Control Systems: Bitbucket, Github

Cloud Platform: AWS (Certified **AWS Certified Cloud Practitioner**)

Concepts: UI/UX, Clean Code

Office Applications: Microsoft Word, Microsoft Outlook, Microsoft Excel, Microsoft PowerPoint, LibreOffice
